(54) FERROELECTRIC  
LIQUID CRYSTAL  
COMPOSITION AND  
LIQUID CRYSTAL DISPLAY  
ELEMENT

(57) Abstract:

PURPOSE: To obtain the present composition, consisting of specific ferroelectric chiral smectic Y liquid crystal compounds and capable of displaying half tone and providing a liquid crystal element having extremely high rate of response.

CONSTITUTION: The objective composition consisting of two or more compounds selected from the group of ferroelectric chiral smectic Y liquid crystal compounds expressed by formulas IWVII, etc. For example, three-color display can be carried out as follows, black, orange and blue in use as a display element of 6 $\mu$ m cell gap and black,

violet and yellowish green in use as a display element of 5 $\mu$ m cell gap.
